

Work Flow for the “DP Deal Tracker”

The “DP Deal Tracker” Google Sheet is designed for a weekly review of all properties listed in the MLS by Dora Puig. The sheet aggregates information from multiple sources, including MLS, other Google Sheets, Follow Up Boss, and Brokermint.com. The workflow below outlines the steps an AI agent should follow to accurately and efficiently fill out this sheet. Also for clarity, see the google sheet template where cells have been colored to identify the different sources of information:

Green: Calculation

Purple: MLS data

Light Blue: Marketing information from other google sheets

Yellow: Follow Up Boss sales information

Dark blue: Brokermint.com files.

Every Monday morning a new tab of the google sheet is created with the updated information of the month, including the data of the week before, to review with the team. One tab a week, with ALL Dora’s LISTINGS, organized by MLS “status”, with the following order:

1) ACTIVE FOR SALE Lists All Dora Puig listings that are Active (A) in the MLS. Each row is a different listing. Data source for each column:

- A:** Sequential number of listings sorted by expiration date, starting with first listing to expire (#1) all the way to the latest to expire (expiration date is in column “N”)
- B:** MLS ID number
- C:** Status. In this active listing section it has to be always “A” as per the MLS
- D:** Property address as it appears in the MLS
- E:** Marketing name. Used by marketing in their advertising
- F:** Lot SqFt. Lot square footage as per the MLS
- G:** SqFt Liv Area. Living area square footage if there is one.
- H:** WF Feet: Water frontage in feet as per the MLS.
- I:** List price (LP) as per the MLS. Cell must be in RED if list price is +20% above the price of comparable homes sold during the weeks/months before the date of the DP tracker review (tab date).
- J:** Lot LP\$/SqFt. Calculation of list price divided by the lot square feet.
- K:** Liv Area LP\$/SqFt: Calculation of Living area price divided by square feet
- L:** Year the house was built as per the MLS
- M:** DOM. Days in the market as per the MLS
- N:** Expiration date. Date the listing expires as per the MLS. The list of active listings should be listed from the closest expiration date (#1) to the latest in increasing

order. In red the cells with expiration date three months or less to day that the sheet is created.

- **O:** Coagent as listed in the MLS
- **P:** Has the listing a DP signage, Yes/No. Source: Marketing google sheet “Property Checklist - DP LISTINGS”
- **Q:** # of SM Posts. How many social media posts of the property this month? Source: Marketing google sheet “LLR Social Media Calendar UPDATED”
- **R:** How many E-Flyers this month? Source: Marketing google sheet “E-flyer Schedule”
- **S:** Date of the last Open House. Source: Marketing google sheet: “
- **T:** # of Leads this month. Source: Follow Up Boss CRM
- **U:** # of Showings his month. Source: Follow Up Boss CRM
- **V:** Hot Prospects of the Month. Source: Follow Up Boss CRM.
- **W:** Team comments or action plan

2) ACTIVE FOR RENT. Same columns. Leave blank if don’t apply (J, K)

3) UNDER CONTRACT. Columns P to T change to the ones below. Input by team.

- P: Effective date.
- Q: Initial deposit due.
- R: Inspection deadline.
- S: Tittle evidence period.
- T: Closing date.

4) PENDING.

5) WITHDRAWN, CANCELLED, EXPIRED. If any.

6) RUNNING LEASES.

- **A:** Sequential number running leases sorted by expiration date.
- **D:** Property Address as per contract.
- **E:** Lease name
- **F:** Monthly price as per contract
- **G:** lease starting date as per contract
- **H:** Lease expiration date as per contract
- **I:** Rent length in months as per contract
- **J:** Total rent value in USD as per contract
- **K:** Landlord agent as per contract
- **L:** Tenant agent as per contract
